The Merlin Project, Cornwall UK

Cornwall's Multiple Sclerosis therapy centre

www.merlinproject.org.uk

Hello, my name is Graham Sluter - I am a reflexologist at "The Merlin Project" in Cornwall UK, providing reflexology to MS Clients, their primary care persons and visitors.

I specialise in Temprana Reflex Therapy Sorensensistem™ which is an advanced reflexology for neurological conditions such as MS, helping to re-educate the brain by manual stimulation of areas and points placed in the face, feet & hands related to the brain, the central nervous system and the hormonal system.

The following hand written note to me was given with permission from my Clients at the Merlin Project for publication:

"Dear Graham, My husband, the ultimate sceptic "I'm not wasting my time and money on that rubbish" has now become your greatest fan. You Graham have made such a difference to our lives. He now has sensation in his feet and hands, has lost the tremble and his memory has improved no end. In fact his mobility and general well being has changed beyond recognition. He sleeps so much better, not so many involuntary movements or visits to the bathroom. This of course has made my life so much better as I get more sleep. We cannot thank you enough and look forward to continuing this interesting journey with you well into the future."

14.11.2010

As a reflexologist I am deeply aware of the benefits of Reflexology. My own experiences as a cancer patient lead me to rely upon Reflexology to help me relax when I suffered post chemotherapy illnesses similar to MS. My curiosity about how Reflexology was helping me rebalance and cope with physical, mental and emotional issues encouraged me to study Reflexology and after qualifying as a Reflexologist I was able to professionally work as a volunteer comforting therapist at the Hospice where I had been a patient. In recent years I have been to Barcelona to study postgraduate Temprana Reflex Therapy especially for conditions such as cancer, neurological and autoimmune illnesses with Lone Sorensen the world famous specialist neurological Reflexologist as my tutor, advisor and mentor.

Temprana Reflex Therapy Sorensensistem™

www.temprana.org

An international complementary therapy for brain injury problems, brain disorders and neurological medical conditions such as Multiple Sclerosis. Frequent reflexology treatments applied to the surface of the skin on the face, feet and hands with neurological acupressure balances that may help to improve connections between the brain and the body. A course of treatments is recommended starting with facial reflexology and then a treatment plan is created including the feet and hands.

*£5 MS & Carers**

£30 Non MS

Facial Reflexology Sorensensistem™

www.facereflexology.info

Facial Reflexology Sorensensistem™ is in essence a combination of the wisdom of ancient medical traditions with modern neuro-anatomy. It may help benefit underlying physical, mental and emotional health conditions. The treatment uses Lone Sorensen's Rosa Mosqueta oil with gentle massage stimulation of specific points and zones on the face. By coincidence this therapy often appears to have rejuvenating face-lifting effects helping to give a naturally glowing complexion as blood flow is stimulated and facial lymphatic drainage improves.

£30 Non MS

Reflexology

www.aor.org.uk

Reflexology is a natural non-invasive holistic therapy using the application of gentle pressure to the feet, which may help to rebalance and revitalize individuals on physical, mental and emotional levels. Reflexology is often recommended for chronic illnesses such as MS.
